Summary

Data Analyst and Research Scientist with over four years of public sector experience. Passionate about strengthening compliance frameworks and driving process improvements that enhance operational efficiency across cross-functional teams. Proficient in SQL, Python, and Microsoft Power Platform (Power Automate), with a strong track record of building automated reporting systems and scalable compliance workflows in fast-paced, collaborative environments.

Professional Experience

DATA ANALYST | City Research Scientist - City of New York | Feb 2024 - Current

- Developed and automated executive reports from EDW using SQL.
- Partnered with HMIS team and external agencies to streamline data workflows.
- Translated complex datasets into actionable insights.
- ETL process creation and management of street homeless outreach and shelter client data.

RESEARCH ASSISTANT | NYU | Sep 2022 - May 2023

- Led research administration for a Hardware-in-Loop wearable alarm device assessing work zone safety.
- Managed student volunteers implementing VR-based training, conducted benchmark experiments, and analyzed sensor data.
- Produced feasibility assessments and business roadmaps for VR training and alarm product deployment.

CLIMATE & ENERGY PROGRAM OFFICER - WWF Korea | Feb 2022 - Aug 2022

- Contributed to the organization's national-level trend analysis on climate and renewable energy programs.
- Collaborated with Partner organizations to hold project meetings on impact reports guiding policy engagement strategy.
- Hosted workshops and supported corporate ESG engagement initiatives.

RESEARCH ASSOCIATE & PROJECT MANAGER - Korea Development Institute | Jan 2019 - Jan 2020

- Coordinated research and administrative tasks for international development consulting programs.
- Conducted market research and facilitated partnerships between government stakeholders and program teams.

GRADUATE RESEARCH ASSISTANT | KOSI / SNU

- Evaluated SME funding programs in Korea using PSM-DID methods, analyzing treatment effects and revenue trends.
- Developed GIS lab materials and tutorials for environmental data visualization using ArcGIS.
- Delivered tutorials and TA sessions for an Introductory GIS course for graduate students for Fall 2021.
- Assisted editorial work for public performance management publications.

OPERATIONS MANAGER ASSOCIATE - Beauteers, LLC

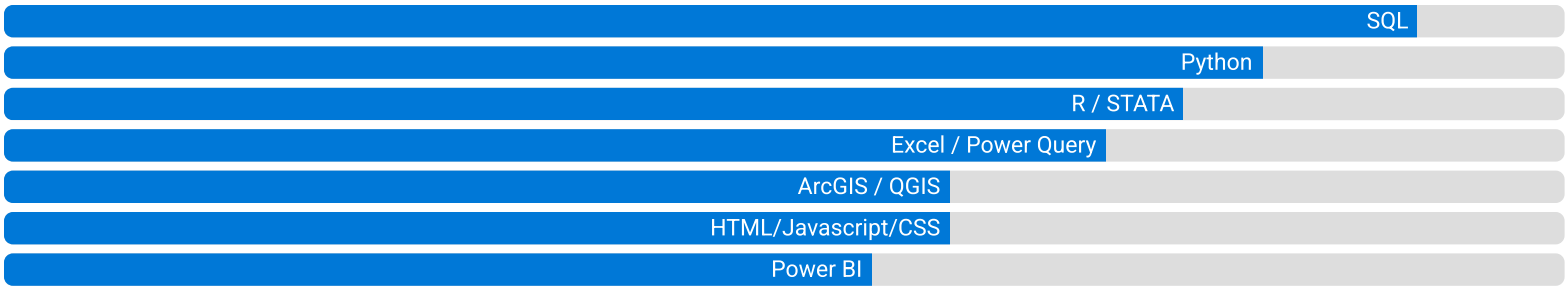
- Oversaw logistics and inventory operations for imported goods.
- Managed buyer workflows using SPS Commerce.
- Served as primary contact for third-party vendors.

Education

M.S. Urban & Regional Planning | Seoul National University

B.A. Environmental Studies | Carleton College

Technical Skills / Tools



Projects

Compliance Dashboard (Streamlit & Excel)

Built an interactive Streamlit dashboard to monitor compliance flags, visualize trends, and generate automated reports. Integrated data from Microsoft Forms and SQL Server, enabling dynamic filtering and views. View Live Demo

HOPE Count Data Analysis & Visualization

Designed dashboards to visualize trends in NYC homelessness data using SQL and Python.

Feasibility Study – Wearable Alarm System

Collaborated with NYU C2SMART Center to evaluate a Hardware-in-the-Loop system for pedestrian safety.

AI / LLM Exploration

Applied NLP techniques using Python to classify and tokenize website text data for coursework analyzing client sentiment.

Logistics Property Market Research Internship, CBRE Korea

Surveyed 70+ logistics warehouse properties across Gyeonggi Province for a market research report.
